

R8 Consistent Reflection Across Teams

Absorbs R12 (Alignment Across Teams). Now the single worksheet for establishing consistent reflection practices across multiple teams or the whole organisation.

Pillar	Reflection	Difficulty	Level 2
Time Required	45-55 minutes	Group Size	Managers/leaders from multiple teams (5-10)
Mode	Leader facilitation (cross-team alignment session)	Format	In-person or remote
Prerequisites	At least one team has been running R1 for 4+ weeks	CLOVER ERA Trigger	Inconsistent reflection practices across teams, some teams reflecting while others don't, no shared learning across departments, reflection data not aggregating

Why This Works

THE NEUROSCIENCE

Consistency signals importance. When the brain observes that some teams reflect and others don't, it categorises reflection as optional. When reflection is consistent across the organisation, the brain categorises it as 'how things work here,' which removes the cognitive cost of deciding whether to do it each time.

Cross-team reflection also activates broader pattern recognition. Individual teams see their own patterns. When insights are shared across teams, the brain can identify systemic patterns that no single team would spot alone. This is organisational learning at a neurological level.

The Exercise

Phase 1: Cross-Team Reflection Audit (15 minutes)

Each manager reports on their team's current reflection practices:

- What format do they use?
- How frequently?
- What outputs does it produce?
- What's working and what's not?

Map the responses. The inconsistencies become immediately visible: one team reflects daily, another never. One uses templates, another uses unstructured discussion. One team's reflections produce action items, another's produce nothing.

Phase 2: Shared Minimum Standard (15 minutes)

WHAT TO SAY

"We're not going to force every team to reflect identically. Different teams have different rhythms. But we need a shared minimum standard: what is the baseline that every team commits to? I'd suggest: one structured reflection per week, using any format, producing at least one action item, tracked somewhere visible."

Agree on the minimum standard. Keep it genuinely minimum: if it's too demanding, teams that aren't yet reflecting will resist. If it's too loose, it won't produce consistency.

Phase 3: Cross-Team Insight Sharing (10 minutes)

WHAT TO SAY

"The biggest missed opportunity in most organisations is that teams learn the same lessons independently. Team A solves a problem that Team B is still struggling with, but they never talk. How do we create a channel for sharing reflection insights across teams without adding another meeting to everyone's calendar?"

Options: a monthly cross-team reflection summary (one page per team, shared in a document), a Slack/Teams channel for reflection insights, or a quarterly cross-team debrief session. The mechanism matters less than the commitment to do it.

Phase 4: Review Schedule (5 minutes)

Schedule a quarterly check-in with the same group of managers: Are teams hitting the minimum standard? What insights have crossed team boundaries? What needs adjusting?

Cross-Pillar Connections

Worksheet	Connection	Direction
R1: Micro-Reflection	R1 provides the individual and team practice. R8 ensures consistency across teams.	R1 is the foundation for R8
R14: Linking to Outcomes	R14 ensures reflection produces visible results. R8 ensures that happens consistently, not sporadically.	R14 supports R8
C3: Transparency Workshop	Cross-team insight sharing is a form of organisational transparency.	Complementary
